## EXPERIENCE

**MoBuzz Media Private Limited**

July 2025 - September 2025

*Role - Web developer intern*

*India, Remote*

- Designed and developed 3 fully functional, responsive websites from concept to deployment, ensuring alignment with client requirements.
- Gained hands-on experience in managing the end-to-end web development lifecycle, including planning, design, coding, testing, and client delivery.

**SkillCraft Technology**

July 2024 - August 2024

*Role - Web developer intern*

*India, Remote*

- Successfully completed 3 individual web development projects during a fast-paced virtual internship.
- Designed and developed responsive, interactive web pages using HTML5, CSS3, and vanilla JavaScript, ensuring clean code structure and cross-browser compatibility.
- Strengthened understanding of frontend development fundamentals, including DOM manipulation, styling frameworks, and layout design techniques.

## PROJECTS

**Healthcare Professional Website – MoBuzz Media Private Limited (React.js , JavaScript, CSS)**

- Designed and developed** a fully responsive website for a medical practitioner
- Collaborated with clients** to gather requirements and delivered a professional solution tailored to healthcare services.
- Implemented SEO best practices** and optimized performance to enhance accessibility and visibility.
- Deployed and maintained** the website, ensuring reliability and user-friendly navigation.

**Bare Glow E-Commerce Skincare Website( HTML, CSS, JavaScript, React.js)**

- Implemented modular components using React.js to create a dynamic front-end interface, including product listings, sliders, testimonials, contact form, and smooth page transitions.
- Utilized CSS3 animations and AOS (Animate on Scroll) library to enhance visual engagement and user interaction.

**Deployed a 2-tier Application on AWS (AWS, Terraform, Docker, Jenkins)**

- Designed and deployed a **2-tier application (frontend + backend)** architecture on AWS using **Terraform** for Infrastructure as Code (IaC)
- Implemented **VPC, EC2 instances, subnets, security groups, and networking** to host application tiers in a scalable, secure environment.
