

SHRUTI DAS

Bangalore, India | +91-6204704820 | shrutidas574@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Computer Science graduate with hands-on experience building scalable, full-stack web applications and backend services. Proficient in **Python, JavaScript, Node.js, and SQL**, with expertise in designing RESTful APIs, integrating asynchronous workflows, and managing cloud deployments on AWS. Strong foundation in data structures, database fundamentals, and automated testing (Jest, PyTest), with a track record of delivering reliable, end-to-end software solutions.

WORK EXPERIENCE

Software Engineer Intern

Feb 2026 – May 2026

RSB Healthcare Consulting

Bangalore, India

- **Engineered serverless Node.js (AWS Lambda) microservices** to automate notifications, reporting, and cross-system data synchronization, reducing manual sync latency by **40%**.
- **Designed and integrated RESTful APIs and database queries**, resolving 25+ production-level integration defects across application, API, and database layers.
- **Implemented automated data verification and error-handling workflows**, cutting incident resolution time by **30%** and ensuring consistent system state across services.
- Participated in Agile sprint planning, code reviews, and technical documentation to maintain system reliability and codebase maintainability.

Web Developer Intern

Jul 2025 – Dec 2025

MoBuzz Media Private Limited

Bhubaneswar, Odisha

- **Architected and deployed 3 full-stack single-page web applications** using React, JavaScript, and Node.js APIs, serving 1,000+ monthly active users.
- **Built modular, reusable frontend and API components**, standardizing architecture patterns and reducing overall sprint delivery times by **20%**.
- **Optimized client-server data fetching and application performance**, reducing initial DOM load delays by **35%** and enhancing system usability scores.

PROJECTS

Insight OS | Python, React, LLM API, REST APIs

- Built a knowledge-management productivity application to ingest, analyze, and surface structured insights from complex user datasets.
- Designed asynchronous API integration workflows and backend data pipelines in Python, achieving under **200ms** query response times.
- Developed modular React user interfaces for interactive data visualization and workflow automation.

Second Brain: AI-Powered Assistant | React, Python, LLM API

- Developed an AI document query engine enabling natural language search across uploaded PDF documents (up to **25MB**).
- Built backend document-processing pipelines using Python to parse, chunk, and embed document text for real-time LLM retrieval.
- Implemented asynchronous client-server communication to stream LLM responses with **30%** lower perceived latency.

2-Tier Cloud Application Infrastructure | AWS, Terraform, Docker, CloudWatch

- Designed and provisioned a 2-tier application infrastructure on AWS using Terraform, covering compute, networking, security, and storage.
- Containerized application services using Docker to create reproducible dev/prod environments, reducing deployment times to under **10 minutes**.
- Configured CloudWatch monitoring, logging, and automated alerting to track system health and ensure **99.9%** availability.

CORE SKILLS

Languages & Core CS: Python, JavaScript (ES6+), SQL, Data Structures & Algorithms, OOP

Backend & Full-Stack: Node.js, Express.js, RESTful API Design, MySQL, Database Design

Frontend & Web: React.js, HTML5, CSS3, Jest, React Testing Library

Cloud & DevOps: AWS (EC2, Lambda, CloudWatch), Docker, Terraform, Linux/Bash, Git/GitHub

EDUCATION

Institute of Technical Education & Research (ITER), Bhubaneswar 2022 – 2026

B.Tech in Computer Science & Engineering- CGPA: 8.69 / 10

CERTIFICATIONS

- DevOps Internals- Siksha 'O' Anusandhan University
- Tata Consultancy Services- Software Engineering Job Simulation (Forage)
